## about me

I spend most of my professional career maintaining and designing high-scalable Linux systems. More recently, I have been learning how those systems are built from the programming side.

---

## technical skills

<b>Languages</b>	lisp, go, bash, typescript
<b>Tools</b>	emacs, git, tcpdump, nmap, docker, ansible
<b>Servers</b>	apache, nginx, kubernetes, qemu, dnsmasq, qmail, postfix, dovecot
<b>Databases</b>	mysql, postgres, elasticsearch, redis, OpenLDAP
<b>OSs</b>	Gentoo, Red Hat

---

## languages

<b>English</b>	Upper Intermediate
<b>Spanish</b>	Native

---

## job experience

### Email Hosting Software Engineer III — Web.com

2017-2018

- Worked on the conversion of a *Qmail* based mail platform from *Gentoo* to *Redhat*.
- Created rpms/spec files.
- Worked on the development of a replacement for *Qmail* on the platform with a solution based on *Dovecot*.
- Implemented a logging solution based on *Fluentd*, *Kafka* and *Postgres*. To identify bad actors and blacklist them accordingly.
- Worked on optimizing current web performance, adding cache layers and investigating new load balance solutions.

### Web Hosting Software Engineer II — Web.com

2014-2016

- Continuing to work on customer support escalation.
- Worked on *WordPress* multinetwork hosting platform, based on *nginx* and percona cluster (mysql).
- Packaging and maintaining all the software related to the *Gentoo* based shared hosting platform.
- Maintaing the in-house configuration management tools and related *PXE* servers and custom kernel build.
- Worked on the development of a *Nginx* based proxy for *SSL* termination. Developed in *Lua* and *Redis*.
- Deployed a *Kubernetes* cluster for development of internal applications.

### Web Hosting Software Engineer I — Web.com

2011-2013

- Troubleshooting customer issues on a *Linux* shared web hosting platform.
- As the last level of support I was responsible of understanding in depth the issue and finding the root cause of it.
- Which consisted of coding issues on the customer code, bad configuration on the server side or missing software configurations.

- Network design and deploy of a *OpenVPN* node and *Squid* proxy. Maintenance and technical support.

## education

---

2015	Professional Penetration Tester	Base4
2014	Red Hat System Administrator I	IT Collage
2010-2011	Systems Engineering	UTN - Incomplete

## personal projects

---

<b>Common Lisp</b>	· several <a href="#">game engines</a> and <a href="#">midi</a> sequencers
<b>Typescript</b>	· reddit <a href="#">image gallery</a> made with React
<b>Gentoo</b>	· <a href="#">minimal docker</a> images
<b>Bash</b>	· integrate several <a href="#">security tools</a> for automated bug bounty work
<b>Golang</b>	· command line clients to view <a href="#">comments</a> of different websites
<b>Erlang</b>	· monitor of public <a href="#">dns</a> records
<b>C</b>	· local system <a href="#">monitor</a>
<b>Latex</b>	· this <a href="#">resume</a> , build and published through Github Actions
