about me

technical skills

I spend most of my professional career maintaining and designing high-scalable Linux systems. More recently, I have been learning how those systems are built from the programming side.

- 🔧 common lisp, bash, go, awk, jq, elm, javascript
- 🔧 emacs, github actions, makefile, docker, ansible
- 📦 sqlite, postgresql
- 🏠 gentoo, red hat

job experience

- Email Hosting Software Engineer III — Web.com2017-2018
 - Continuing the OS migration now on the shared email platform. From using `qmail` to `postfix`.
 - Implemented a centralized logging solution based on the `Fluentd`, `Postgresql` and `Grafana`.
 - Automated `qemu` vm creation for non-production environments, using `ansible`.
 - Deployed a `kubernetes` cluster for running `selenium` integration tests.
- Web Hosting Software Engineer II — Web.com2014-2016
 - Development on a dynamic ssl web proxy, based on `nginx` and `lua`. Backed by `redis`.
 - Troubleshooting issues on a multi-network `Wordpress` installation. Backed by `mysql` Percona Cluster.
 - Single-handedly migrated part of the web hosting platform from `Gentoo` to `RedHat` using `Ansible`.
- Web Hosting Software Engineer I — Web.com2011-2013
 - Troubleshooting L3 customer support requests on a `LAMP` based shared hosting platform.
 - OS maintainer of a `Gentoo` Linux fork used across the shared hosting platform. From kernel to libraries.
- Jr. Linux System Administrator — Sols S.A.2011
 - Network design and deploy of a `OpenVPN` node and a `Squid` proxy. Maintenance and technical support.

education

languages

2025	Back-End JS	BA Aprende	
2024	Front-End JS	BA Aprende	
2015	Penetration Tester	Base4	English Upper Intermediate
2014	RHSA I	IT Collage	Spanish Native
2010/1	Systems Engineering	UTN - Incomplete	

personal projects

- Common Lisp several game engines and midi sequencers 🔗
- Golang command line clients to view comments of different websites 🔗
- Elm web search of tech podcasts 🔗
- C register x11 events into an sqlite database to track activity 🔗
